

# Predicting Delays at the Inter-American Development Bank

Is the tool useful?

Selina Carter

*Data Scientist, Inter-American  
Development Bank*

@Selina\_Carter\_

This presentation was prepared by the author in her personal capacity. The opinions expressed are the author's own and do not reflect the view of the Inter-American Development Bank (IDB).

## Team

(Chapman University)

# Overview

## I. What is the model?

Business need

Data

Challenges

Results

## II. Do managers find the tool useful?

# What's the **business need**?

## What is the Inter-American Development Bank?

- Leading source of development financing for Latin America and the Caribbean
- Offers loans, grants, and technical assistance to governments
- Aims to reduce poverty and inequality
- Main instrument: sovereign guaranteed (SG) investment loans

SG investment loans	
Average loan size	\$67 million
Loan approvals	≈ 90 new loans per year
Loans in execution	≈ 500 loans at any time point

# Example Project: Salto Grande Hydroelectric Dam Modernization

## RG-L1124 : Modernization of the Salto Grande Binational Hydropower Complex

Project Status: **Implementation**

The overall objective is to help ensure the availability of the Salto Grande Hydropower Complex (SGHC), enhancing the reliability and efficiency of the interconnection between Argentina and Uruguay. The specific objective is to assist in extending the useful life of the SGHC by modernizing its infrastructure and equipment

### PROJECT DETAIL

PROJECT NUMBER	RG-L1124
APPROVAL DATE	November 28, 2018
PROJECT COUNTRY	Regional
PROJECT SECTOR	ENERGY
PROJECT SUBSECTOR	ENERGY INTEGRATION
PROJECT TYPE	Loan Operation
ENVIRONMENTAL AND SOCIAL IMPACT CATEGORY	B
PROJECT STATUS	Implementation
OPERATION NUMBER	<a href="#">4694/OC-RG</a> 
OPERATION NUMBER	<a href="#">4695/OC-RG</a> 

### PROJECT INFORMATION

TOTAL COST	USD 80,000,000
COUNTRY COUNTERPART FINANCING	USD 0
AMOUNT	USD 80,000,000

**≈ 5 years to disburse 100% of funds**

## What's the **business need**?

- “Delay” = IDB doesn’t disburse 100% funds on time
- What percent of SG loans are delayed?
  - **78%** (of SG loans since 2000)
  - Average delay = **14 months**
  - **33%** had extension > 24 months.
- What does this cost the Bank?
  - IDB spent **\$50 million** on the supervision of extended loans between 2010 and 2017.<sup>1</sup>

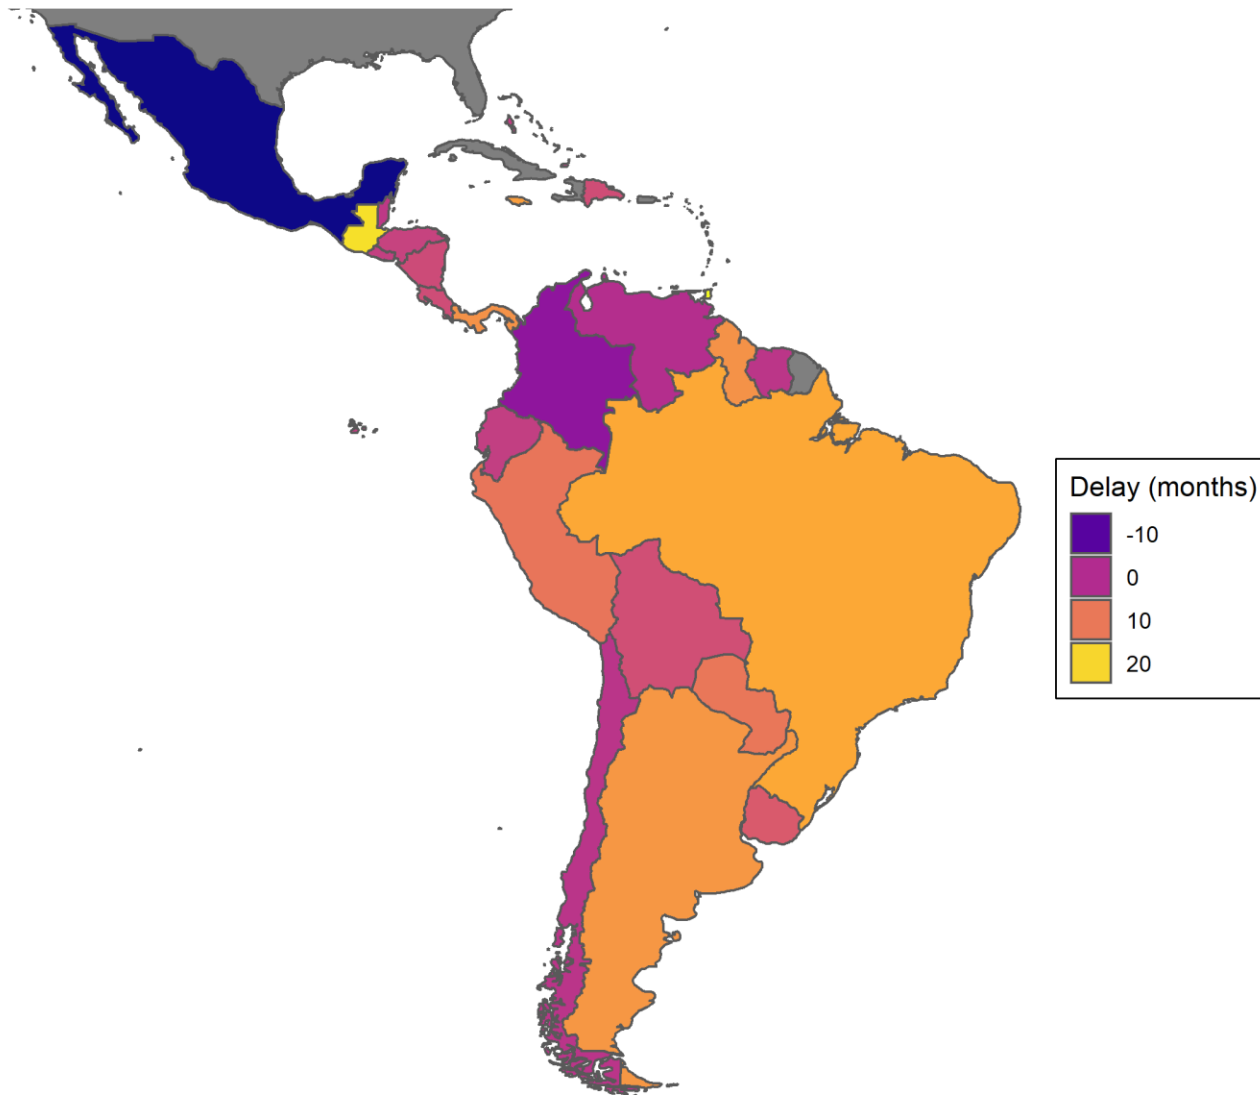

1: Quarterly Business Review (QBR-1 2018), SPD/SMO. Page 7.

2: Advisory Report September 2019, Office of the Executive Auditor, 2019

# What's the **business need**?

Average project delay by country (IDB)  
Original deadline to date of 95% of funds disbursed

# What's the **business need**?

## Objectives:

### Predict delays

- ➡ Help managers develop a *proactive* approach to avoid delays.

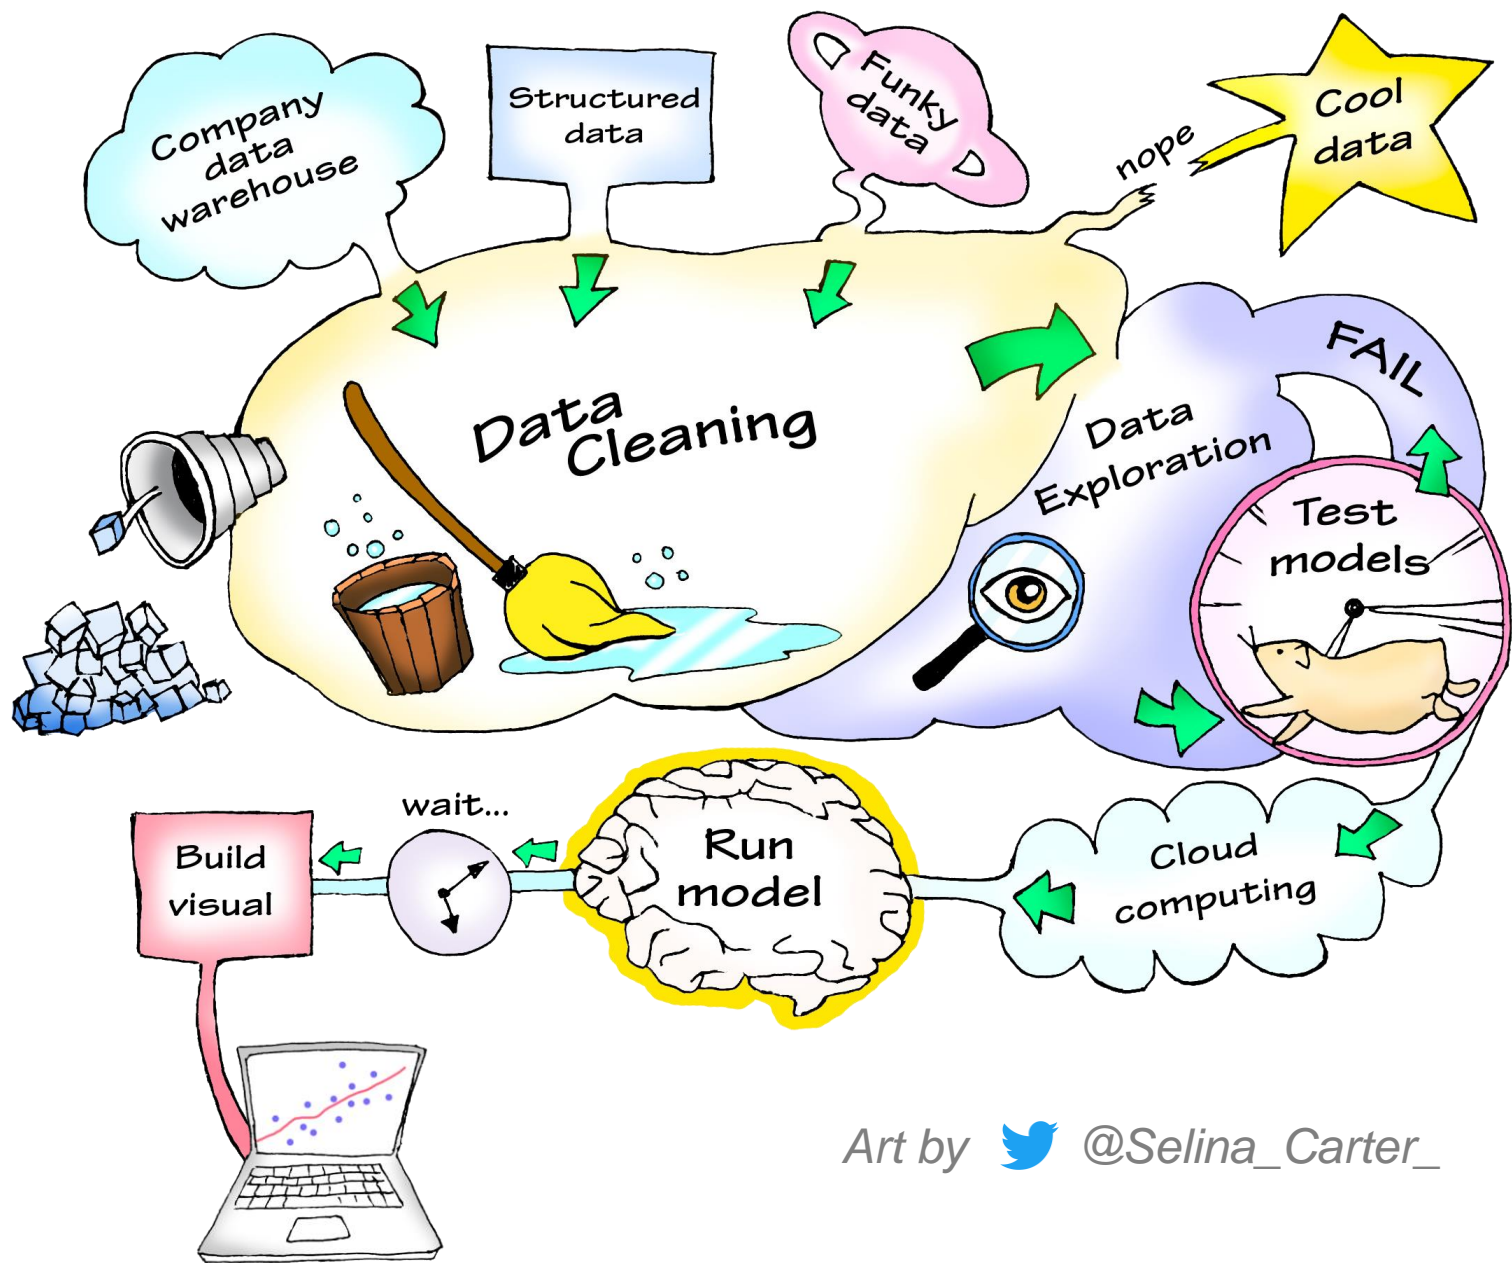

### Real-time knowledge

- ➡ Know risk of delays *ex ante* (as soon as a project is approved)
- ➡ Updated monthly

### Clear visualization

- ➡ Dashboard displays results.

Art by  @Selina\_Carter\_

# What's the **data**?

100+  
features

(Fixed over time)

(Dynamic)

## Fixed variables

- Country
- Department
- Approval year
- Approval quarter
- Approved amount (\$)
- Environmental/social risk rating
- Type of approval procedure
- Country requires ratification

## Executive agency experience

- Type of agency (ministry, municipality, etc.)
- Driving distance (km and minutes)
- # of projects agency simultaneously manages
- # of projects has managed in past
- Years been a client of IDB

## Findings & recommendations

- language
- # of characters used
- # of fields entered
- Keyword search: "delay" and "disbursement"

## Preparation data

- Time spans (months)
  - On Convergence → Start
  - Start → ERM
  - ...

## Relationship data

- Has OPC TC
- Part of credit line
- Part of sequence
- # in sequence
- # of loan contracts

## Team Leader data

- # changes in TL
- # projects TL managing
- # projects has managed in past
- Years been a TL
- (no personal data)

## To add

- External country-level variables (GDP growth, etc.)
- More time & labor info
- Expenses (\$) data
- Team composition
- Ideas are welcome!

## Results

- PMR stage
- CPI & SPI
- Synthetic indicator (PMR)

# What are **challenges**?

**Stay organized!**

# What are the results?

Mean Absolute Error (MAE)	
Training set	Test set
3.6 months	11.1 months

# What are the results?

The algorithm uses historical data to estimate project 'delay': the time (in months) from the Original Disbursement Expiration Date to the date at which the project disburses at least 99% of its current approved amount.

- The universe includes SG investment loan projects except for the following modalities: CND, IRF, and TCR.
- Projects shown have disbursed less than 99% of current approved amount as of 2021-05-31.
- 'Project age' refers to the time (in months) from project approval to 2021-05-31.
- With questions, email [predict\\_delays@iadb.org](mailto:predict_delays@iadb.org)

# What are the results?

The algorithm uses historical data to estimate project 'delay': the time elapsed (months) from the Original Disbursement Expiration Date to the date at which the project disburses at least 99% of its current approved amount as of 2021-05-31.

- 'Project age' refers to the time elapsed from project approval to 2021-05-31.
- Training and test samples represent SG investment loans approved since 2008 that disbursed at least 99% of their current approved amount as of 2021-05-31. (We exclude the following modalities: CND, IRF, and TCR.)
- With questions, email [predict\\_delays@iadb.org](mailto:predict_delays@iadb.org)

# What are the results?

## What influences predictions of project lifespan?

**AR-L1067** (76% of \$60M disbursed after 102 months)  
as of 2021-05-31

Predicted lifespan: **99 months**  
Predicted delay: **39 months**

Planned Lifespan: **60 months**  
Current Extension: **54 months**

## II. Do managers find the tool useful?

- Survey to managers and analysts (ongoing, started last week!)
  - 179 responses ( $\approx 40\%$ )
- Main results:
  - **73%** find the tool useful
  - **85%** find the tool easy to understand
  - **66%** find the tool innovative

How useful is the tool?
